Helping airport professionals understand passenger traffic trends

ARC's Market Locator tool offers insight into U.S. air passenger travel purchases and behavior to identify opportunities to build consumer loyalty and improve air service development efforts.

How can I use Market Locator to identify my relevant markets?

**Pinpoint passenger location**
Determine the best place to focus development efforts by identifying the actual location of air travelers in the United States, down to the zip code level. See where the highest volume of passengers are originating from—not just the point of sale location—to identify opportunities for growth.

**Improve market operations**
Use Market Locator data during supplier conversations to endorse the addition of new routes or route frequencies. Identify local need as well as leakage and diversion trends to bring new carriers and more service to your market.

**Uncover air purchase trends**
Analyze purchasing trends at the customer level to better understand your market and the relationship between purchaser location and travel behavior, with filter options, including origin and destination, class of service, trip type and marketing carrier.

**Make proactive business decisions**
Use forward-looking ticketing data to make business decisions based on advance travel trends. Filter results based on airport pair, city market, any destination or origin on a ticketed itinerary to understand seasonality of markets.

Understand travel trends based on consumer location

With Global Agency Pro, you can drill down to the zip code level for better insights into traveler booking trends. Pinpoint where the highest volume resides and how their travel patterns are changing year over year.
High-quality data at your fingertips

- **Intuitive Dashboards**: Easily analyze point-of-sale and travel behavior data through interactive graphs and mapping as well as export options for reporting.
- **Daily updates**: Access up to two years’ worth of historical airline ticketing data plus up to twelve months of purchased tickets not yet flown.
- **Geographic analysis**: Analyze passenger trends down to the zip code level, measure by carrier and compare results against competing airport locations.
- **Comprehensive search**: Query the data in endless ways to get the specific answers you need and reveal new consumer insights around marketing carrier, purchaser location and more.

**The timeliness of the data in Market Locator is a real differentiator. Within days of an announced downgrade in air service by a carrier at a competing airport, I was able to gauge the potential impact by examining passenger behavior.”**
